EC DAMPER  
GRILLE

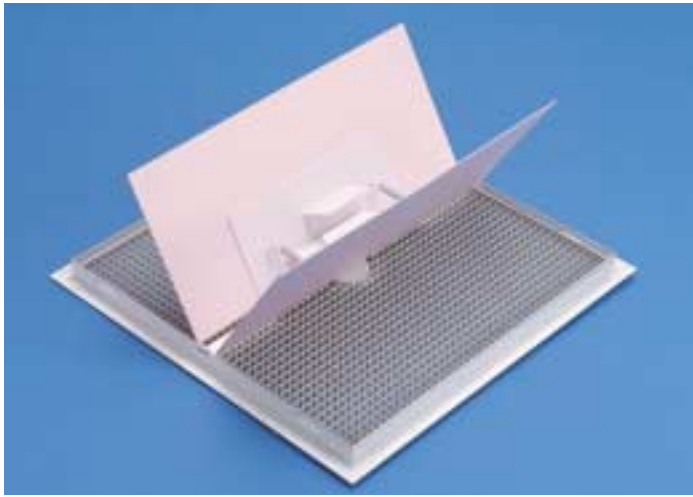

---

Designed to operate in conjunction with the Edmonds  
range of HURRICANE® TURBINE VENTILATORS.

---

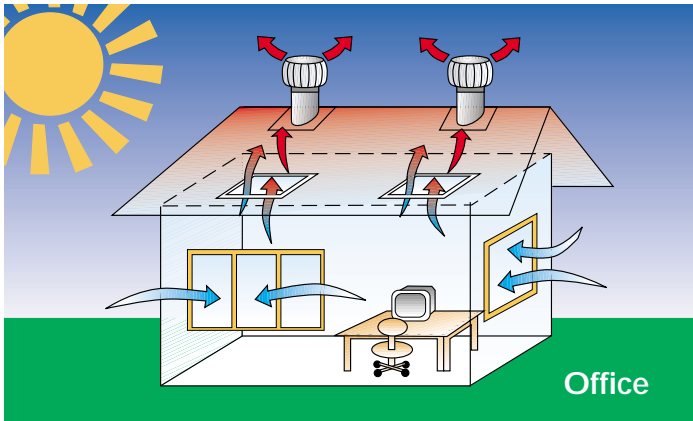

Cam operated opening and closing mechanism.  
Patent pending.

The **Edmonds EC Damper Grille** is an egg crate grille fitted with a damper that allows the product to be easily opened and closed at will, with a wand provided to assist with operation at high levels.

The **EC Damper Grille** assists the movement of large air flow rates. This is important wherever there are crowded environments or there is the need for the introduction of constant, fresh air, for example, school rooms, office buildings or other industrial situations.

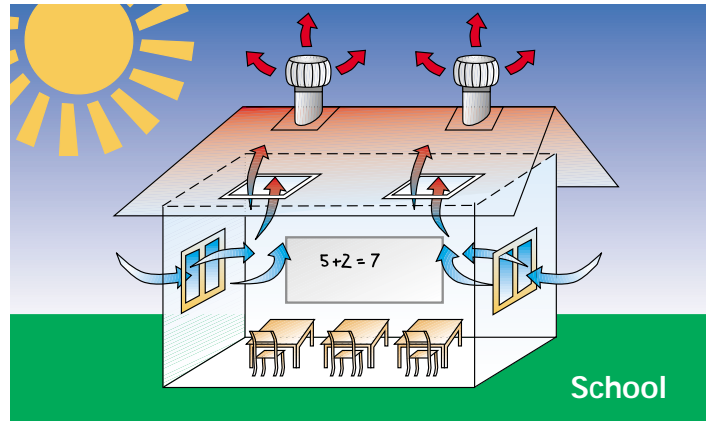

Office

EC Damper Grille is made of corrosion resistant aluminium in a powdercoat finish.

When room conditions become too hot or stuffy, the damper is simply opened to allow warm, stale air a passage to escape. To prevent heat loss during colder weather, the **EC Damper Grille** is simply closed.

It is recommended that the **EC Damper Grille** be installed in conjunction with the **Edmonds** range of **Hurricane Turbine Ventilators** to facilitate the requisite number of air changes per hour, using the ceiling space as a plenum, as illustrated:

School

**THE EDMONDS EC DAMPER GRILLE IS AVAILABLE IN TWO SIZES**

25 mm      395 mm      25 mm

**400 mm x 400 mm**
