Colour:	Black

## Ventilating the Wet Areas of a Home

To comply with clause 10.8.2 from the NCC2022 Housing Provisions Standard, the wet areas of the home must be exhausted to outside air. Roof Valve BAL is ideal for this application, as it can be installed on all types of roofing, including tile and metal. It is also complementary to Bradford Ventilation's BAL-rated range for a complete solution.

## Benefits of ventilating your home

### Heat Reduction

Removes heat and replaces with outside air

### Energy Efficient

Helps reduce the load on air conditioning

### Moisture Management

Reduce the risk of moisture-related damage to your space

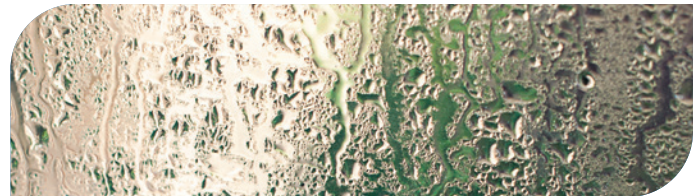

### Improve Air Quality

Replaces stale and polluted air with outside air

## Why Ventilate?

Effective ventilation is an important way to create a more comfortable, healthier and energy efficient home. Reducing the heat in summer and managing moisture in winter helps to create a better living environment for all occupants. The Roof Valve BAL will effectively ventilate the wet areas of your home when ducted.
